Escuela Da Vinci – 2022 – 2024

Higher Technician in Web Design and Development

Escuela Da Vinci — 2022 – 2024

PROFILE

Backend Developer with experience building and maintaining financial systems in production environments.

I work across the full software lifecycle, including design, development, deployment, and infrastructure. Specialized in API development, third-party integrations, and resolving critical production issues.

EXPERIENCE

SOFTWARE ENGINEER (FULL STACK)

Syloper — Dec 2025 – Present

- Developed financial systems in production using monolithic and serverless architectures
- Built backend services using AWS Lambda (SST)
- Implemented frontend features with React and TypeScript
- Integrated external APIs and ERP systems
- Managed authentication flows and token-based communication between services
- Handled deployments, environment management, and cloud debugging
- Redesigned UI components based on Figma designs
- Participated in planning, estimations, and code reviews

BACKEND DEVELOPER (LARAVEL)

Telepagos — Jun 2025 – Oct 2025

- Developed backend modules using Clean Architecture principles
- Optimized database queries across a system with 200+ tables, improving performance and response times
- Resolved critical production issues, increasing system stability
- Documented APIs using Swagger
- Improved backend/frontend communication

FULL STACK FREELANCE DEVELOPER

Private projects / confidential clients

- Led development and recovery of systems alongside another developer
- Recovered a critical school management system in 14 days, stabilizing backend and frontend in production
- Designed and implemented a multi-tenant SaaS platform for restaurant reservations
- Defined system architecture, scalability, and business logic
- Managed direct client communication, task prioritization, and delivery timelines

IT CONSULTANT

IT Point — May 2024 – Apr 2025

- Optimized Windows and Linux systems
- Diagnosed and resolved hardware and software issues
- Improved system performance and stability

PROGRAMMING TUTOR

Freelance – Apr 2024 – Mar 2025

- Delivered personalized training in Laravel, Node.js, and React
- Helped students improve performance through practical, project-based learning
